

Kina

Kina

Kina references the inner shell of the local salt water sea-urchin called kina in Māori. David saw a kina shell in Antarctica – nestled in a tiny hollow in the sea ice. The shell had absorbed enough warmth from the sun to melt into the ice around it.

Kina is available in various sizes to suit any space. The plywood finish can be either raw bamboo or painted, offering a range of options.

Features

Shipped Kitset

Seed System kitset lightshades are on average 1/30th of the volume of the assembled light. This aims to help minimize the effects of shipping and to reduce the design's environmental footprint.

Warranty

This light is warranted for three years from date of purchase for failure of parts.

Care Instructions

All lights are intended for use in dry interior conditions only and can be cleaned with a soft cloth dampened slightly in warm water when the light is switched off. Do not use detergents.

EPD Certified

An EPD is a standardised and verified way of quantifying the environmental impacts of a product, based on a consistent set of rules that have been developed through a stakeholder consultation process.

*Black comes with black cordset and fasteners. All others come with white cordset and white fasteners. Custom lengths available on request.

Finishes

We offer 12 stock finish options for Kina. We use low VOC acrylic paint and it is most commonly used on the interior of the light. We can also produce lights in other finishes or colours by special order. All lights are made from sustainably grown bamboo plywood sourced from an FSC accredited factory.

Installation

1000mm/39"

1400mm/55"

Fixings for cone gripper (fixing screws NOT SUPPLIED).

Note: Choose appropriate hardware to attach base plate (Fig.1) to ceiling substrate.

Options

Step 1.

Decide upon hanging distance. Use the schematic diagram as a guide to pick a circle radius to be marked out on ceiling. This circle can be marked with a length of timber or string.

Step 2.

Mark 3 hanging points where your cone grippers will be located. You can either centrally locate the ceiling canopy or run the electric cord up one of the suspension wires.

Installation - 1000mm / 39" & 1400mm / 55"

Step 1.
Unscrew baseplate.

Step 2.
Use appropriate fixing screw to mount base plate (Fig.1).

Step 3.
Remove cable from cone. Screw cone back onto baseplate. Re-insert cable and level light. Once desired position is set, trim excess cable.
